TransCanada Highway (TCH) – Sarcee Trail Interchange Update

Site preparation for the new interchange at Trans Canada Highway (TCH) and Sarcee Trail is set to begin next week. The interchange project starts with tree removal and the transplanting of some rare grasses to a protected area. As Calgary is experiencing an extremely mild winter, this important first step is necessary to prevent birds from nesting in the development area.

Every effort has been made to maintain the natural environment and to minimize tree removals. The area was surveyed and a value was assigned to the trees being removed which will be used to replant trees within the surrounding community.

This work is scheduled to commence the week of April 4, 2016.

The TCH-Sarcee Interchange is a joint project between The City of Calgary and Trinity. For continued updates on the project, please visit www.TrinityHills.ca/TCHSarcee.
